Hospital Compare is a consumer-oriented website that provides information on how well hospitals provide recommended care to patients. The data allows consumers to look at different hospitals and see how they measure up in areas of Patient Satisfaction, Preventative Care, Emergency Department, and Disease specific treatment. Hospitals are ranked on a 5 star rating system and there are 8 variables that make up the ranking. Outcomes: Mortality, Safety, and Readmission; Patient Experience; Process: Effectiveness and Timeliness; and Efficiency: Imaging and Cost. After all information is in, there is a formula that calculates a facility’s overall star score. There are 91 Acute Care Hospitals in Oklahoma. 43 of them are 3 star hospitals; GMH is included in this group. Other 3 star ranked facilities are Comanche County, Duncan Regional, Mercy, and St. Anthony to name a few close by.

Below is a graph showing a few of the areas measured and how GMH was ranked in comparison to other facilities in Oklahoma as well as Grady Memorial Hospital in Atlanta, GA.
